PROFESSIONAL SUMMARY

Junior full-stack developer (Vue, Node/Express, MySQL) with six months of bootcamp training and team project experience as both developer and project manager. Built a JWT authentication backend with role-based access control and enforced pull request reviews on a six-person team. Now in the LC Studio internship phase, preparing for a junior placement. Earlier admin, warehouse, and customer-facing work means I'm comfortable with messy data, written procedures, and deadlines. Open to junior full-stack, frontend, or backend roles.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), SQL, HTML5, CSS3, Python, PHP
Frameworks: Vue.js, Node.js, Express.js, Bootstrap
Databases: MySQL, relational design
Tools: Git, GitHub (branch protection, pull request review), REST APIs, JWT authentication

PROJECTS

- **HRflow, HR management system** | Vue, Node.js, Express.js, MySQL | GitHub | Live Demo
  Team of four. Built the frontend and backend for the dashboard and employees pages. Wrote two REST endpoints: one serving employee data from the database to the employees page, and one pulling data from multiple tables for the dashboard. Managed the Git repository during the frontend phase.
- **Pawtopia, pet care booking platform** | Vue, Bootstrap, HTML, CSS | GitHub | Live Demo
  Startup Launch Challenge, team of six. Project manager and frontend developer. Set up branch protection so nothing was merged without my review, and coordinated contributors across the app's structure and user flows. Deployed on GitHub Pages.
- **Handled, field-service management app (in progress)** | Node.js, Express.js, MySQL | GitHub
  Personal project. Built the backend authentication: JWT login, password hashing, sessions, and role-based access control. Frontend is still being built.
- **ArtisanHub, ecommerce marketplace** | Vue, Node.js, Express.js, MySQL | GitHub | Live Demo
  Team project. A marketplace where sellers list handmade pieces and buyers order custom work. Built the login APIs and wrote the project charter and proposal.

PROFESSIONAL EXPERIENCE

Intern, LC Studio | Oct 2026 to present

- Built a professional portfolio and CV in preparation for employer placement. Group projects to follow.

Bookseller (seasonal), Bargain Books | Dec 2025

- Gave personalised recommendations and processed sales on POS systems accurately during the holiday peak
- Set up and rearranged promotional displays, keeping the shop organised under pressure

Admin & Marketing Assistant, Shireen Onia (personal brand and Training Gurus) | Nov 2024 to Oct 2025

- Consolidated transaction records for two financial years and sponsorship recipient data across multiple African countries into structured Excel spreadsheets
- Wrote 20+ standard operating procedures for staff training at Training Gurus
- Produced photo, video and branded social content for property listings and personal brand marketing

Warehouse Assistant, Bidvest Steiner | Jun to Oct 2024

- Picked and staged stock for multiple delivery routes, keeping fulfilment accurate and on time
- Quality-checked returned and faulty equipment, supporting inventory control and reporting

Educator's Assistant, Wingfield Primary School | Feb to Dec 2023

- Tracked learner progress through marking and reading assessments
- Set up laptops and projectors for school events and prepared bulk materials for staff

EDUCATION

1. Full-stack Web Development Bootcamp, Life Choices Academy, Cape Town | Apr to Sept 2026
2. National Senior Certificate (Matric), 2020
